

PHCO₂ is excited about CBT

We have identified CBT, along with many other naturally occurring cannabinoids, in our whole plant hemp extracts—both Certified Organic and American conventional—and it is now available to you as a cannabinoid minor.

CBT is a very rare cannabinoid and typically difficult to extract, as it occurs in low concentrations. Our proprietary CO₂ supercritical fluid process allows for the safe and efficient extraction of this highly sought-after minor.

First discovered in 1966 in Japan, CBT is gaining ground steadily in the industry for its application as a therapeutic element.*

Ask us about CBT

PHCO₂ whole plant hemp extract ingredients retain the highest CBD with all the natural minors that this plant offers.
